Summary

- Software Development Engineer with hands-on experience in designing and building scalable full-stack applications using React.js, Spring Boot, and MySQL. Proven ability to engineer REST APIs, design microservices-based architectures, and deploy applications using Docker, Kubernetes, and CI/CD pipelines. Strong foundation in Data Structures, Object-Oriented Programming, System Design, and Agile Development. Seeking to contribute to high-performance and scalable software engineering systems.

Education

- **KL University**, Vaddeswaram, Guntur 2023 – 2027
• *B.Tech in Computer Science and Engineering (CGPA: 9.17/10)*
- **Sri Chaitanya Junior College**, Vijayawada 2021 – 2023
• *Intermediate Education*
- **Nirmala High School**, Machilipatnam 2011 – 2021
• *Schooling*

Projects

- **Online Patient Discharge Summary Generator — AI Project** Jan 2026
• *React, Spring Boot, MySQL, Ollama AI*
- Engineered an AI-powered discharge summary system leveraging NLP and large language models to convert unstructured clinical data into structured reports, reducing manual effort by 60%. Designed scalable backend services using Spring Boot and built an interactive React frontend for real-time processing.
- **Blood Banking System — life4change.onrender.com** Sep 2025
• *Docker, Kubernetes, CI/CD*
- Designed a centralized blood bank management platform to monitor blood availability and donor records with validation logic. Implemented containerized deployment using Docker and Kubernetes and executed CI/CD pipelines, improving deployment efficiency by 40% and reducing manual effort by 50%.
- **Online Voting System — github.com/2300030270/FSAD-PROJECT** Mar 2025
• *React, Spring Boot, MySQL*
- Built a secure online voting platform with RESTful APIs for authentication and vote processing. Implemented a strict one-person-one-vote validation mechanism and enhanced accessibility by enabling remote participation without dependency on physical polling systems.

Skills

- **Programming Languages:** Java, C, JavaScript
- **Full-Stack Development:** React.js, HTML, CSS, Spring Boot, REST APIs, Microservices
- **Cloud & DevOps:** Docker, Kubernetes, CI/CD, Jenkins, Cloud Deployment
- **Tools & Platforms:** Git, GitHub, IntelliJ IDEA, Postman, Power BI, MySQL
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Design Patterns, System Design, Agile Development
- **Professional Skills:** Communication, Problem-Solving, Adaptability, Continuous Learning

Certifications

- Aviatrrix Multi-Cloud Network Certification
- Salesforce Certification
- Oracle Certified Architect Associate
- Cambridge Linguaskill Certificate (B2)

Experience & Achievements

- Core Member, Vyuha Club — Coordinated and executed multiple technical events with 70+ participants, strengthening leadership, teamwork, and organizational skills.

Languages Known

- English, Hindi, Telugu
